4 to 6:

Recommend concurrence. Distinction should be made, however, between those cases implied in this memo (where the employee is physically able and available to perform duty at headquarters while a disposition for overseas assignment is pending) and those cases where the employee is still under medical treatment. In the latter cases, charge to sick leave is, of course, clearly appropriate. It is our view that in neither type case should an extension of the Vietnam tour be required.

MEMORANDUM FOR: Deputy Director for Support

SUBJECT: Tour Computation for Home Leave Purposes - Saigon

REFERENCE: FAM 4521, dated 23 December 1967

1. Paragraph four contains a recommendation for approval by the Deputy Director for Support.

2. Continuous service abroad per reference is delayed by time spent in a leave status in the United States, including time spent in a leave status while on medical orders.

3. Several cases involving sick leave in the United States while on SMA followed by a medical hold pending OMS clearance leads the Division to request policy guidance in the treatment of time spent during the medical hold. This period when the employee is ready for duty (either at Headquarters or at the visitation point) should not count towards his tour extension nor should it be charged to sick leave. The employee could be returned to Headquarters for duty from the visitation point or he could remain in an administrative status if the medical hold is expected to be of short duration.

4. It is recommended that time spent in the United States on medical hold not extend the Vietnam tour and that this period be considered as duty time.
